Folding Pocket Thermometer

- CAL Check™
 - Alerts users of calibration status

The folding Checktemp®4 provides practical temperature measurement for the food service industry.

Special attention was given to the ergonomic form of Checktemp®4. This thermometer fits comfortably and securely in your hand while the LCD on the side of the handle remains easy to see and read. The fast-responding, fold-away probe is made of high quality stainless steel and can penetrate semi-frozen and semi-solid foods such as meats, ice cream and cheeses. When you are finished using your Checktemp®4, wipe the probe clean and fold it away. Checktemp®4 automatically turns off so you can safely carry it in your pocket.

CAL Check™

As you unfold the stainless steel probe, the Checktemp® 4 automatically turns on and immediately performs a calibration test. This unique Hanna feature, CAL Check™, provides the security of knowing you have accurate measurements. CAL Check™ also lets you know if your battery level is low or if your meter requires recalibration.

- Turns on and off by opening and closing the probe
