The Checktemp®Dip is a high-accuracy thermometer with a 3 m (9.9') flexible, silicone cable connecting the meter and the AISI 316 stainless steel weighted probe. This probe is in compliance with food regulations, making it an ideal instrument for measuring temperature in food applications such as wine casks and milk tanks. The probe incorporates an NTC thermistor sensor to measure the temperature. Thermistors make it possible to obtain extremely high accuracy in a very short period of time.

Checktemp®Dip can also be used for applications such as fish farms, water reservoirs and pools where the operator can simply stand on the edge of the water and dip the probe in.

The Hanna CAL Check™ feature has been incorporated into the Checktemp®Dip for reliable and accurate measurements. CAL Check™ automatically runs a self-check diagnostic upon startup and reports status back to the user.

Select between °C or °F measurement in one tester

- **CAL Check™**
 - Automatically verifies calibration at startup and alerts the user of the calibration status.
