

The penetrating PH tester is highly accurate, stable and reliable. It can measure the PH value and temperature and display them clearly in the LCD backlit screen.

Designed for the measurement of semisolid substances in food production and processing such as fruit, vegetables, paste, bread, gel, some kinds of meat. Compact and portable design allows easy portability.

- Auto power off
- Temperature unit conversion °C and °F
- Temperature compensation
- Light alarm function
- Data hold function
- HD backlight display
- Needle probe
- Overrange alarm prompt
- Measure semi-solid substances

Feature:

- PH measurement range: 0.00~14.00PH
- Basic errors in PH measurement: ± 0.05 PH
- Measurement stability: ± 0.03
- Solution temperature compensation range: 0-70°C
- Instrument Repeatability: ± 0.01
- Solution temperature under test: 0-60°C
- Power supply: 1.5V AAA batteries*2pcs (not include)
- Display: Large LCD display
- Working temperature range: 0-50°C
- Working humidity range: $\leq 80\%$ RH
